## Press Release: Expo Increases Size and Capacity of Facility

Expo Technologies are pleased to announce that it will be moving its UK operations to new premises.

The move, which will take place over the week commencing 26<sup>th</sup> November 2012, will provide Expo with a larger premises of modern construction form which to continue and grow its operations and headquarter activities.

Expo Technologies, world leader in purge and pressurization, and experts in hazardous area applications and innovation will move to:

Unit 2 The Summit,  
Hanworth Road, Sunbury On Thames  
Middlesex, TW16 5DB

Telephone numbers will remain unchanged as does email and, of course, our website. [www.expoworldwide.com](http://www.expoworldwide.com)

Peter MacAulay, Managing Director said

“ I am delighted to be able to announce this move. Moving less than 5 miles or 8 km means that we will have been able to retain our skilled and experienced staff who work to deliver great products and solutions to our customers around the world. The larger modern facilities, which we have configured to meet our specific needs, will enable us to continue to deliver great service to our customers as our business continues to grow. Our staff is working hard to ensure a smooth transition to the new site. I would like to take this opportunity to thank both our staff and our customers without whom this exciting development would not be possible.”

Editors' notes:

Expo Technologies has been in the South West London area for over 50 years. Expo employs 85 people in the UK and also has sales, support and manufacturing facilities in Ohio, USA. It is a pioneer and innovator in purge and pressurization which allows regular electrical equipment to be used safely in hazardous areas where there is a risk of explosion due to flammable gases vapours or dust. Expo makes a range of standard products and also uses its designs and expertise to provide custom engineered solutions for its OEM and end user customers around the world. Expo sells and supports its products through a network of representatives and distributors around the world as well as having dedicated service and consultancy personnel who can support its large user base.

Expo Products carry a number of international certificates and approvals which provide the assurance that they conform to recognised international safety standards. These include IEC Ex, ATEX, FM and UL approvals. As well as purge and pressurization , know as Ex p , Expo designs engineered solutions using Ex n, Ex e , and Ex d protection concepts as well as intrinsic safety .
